No. of Pages: 1

This is UNEVALUATED Information

PROCESSING COPY

On 9 October 1955, a 10 to 12-meter steel skeleton tower, which was braced several times, was observed on the Erfurt-Walterhausen highway (about 50 meters east of the point where the road to Egstedt branches off). One or several cables extended to the ground from the upper section of the tower. The device fitted to the top of the tower was exactly pointed in an east-west direction. 25X1

25X1

Comment: The radio tower possibly belongs to a VP decimeter-wave installation.
